Map chart showing number of completed activities by a sales rep at each customer

Type: Map Chart

Activity by type by sales rep

Type: Bar Chart

Activity completed vs overdue vs scheduled by sales rep

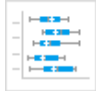

Type: Bar Chart

## Chart Selection

Below details the types of charts we can create and what they can be used for.

### Analytical

| Icon  | Type          | When To Use  |
|---|---------------|--|
|  | Scatter       | A scatter plot (points not joined) chart that allows the charting of 2 related attribute series. Can only be used if the data series are related. Useful for seeing trends in data that is not linear. |
|  | Treemap       | Compares metric values via a size relationship. Can also be used to show hierarchical relationships.   |
|  | Histogram     | Shows the number of times a given value occurs in the dataset.   |
|  | Box & Whisker | A chart which gives a quick overview of series of values and their statistical properties.   |
|  | Trellis       | A segmented chart for which the behaviour is determined by the data selected.  |
|  | Heat Grid     | Plots the intensity of a metric across multiple categories.  |

### Area Charts

| Icon  | Type         | When To Use   |
|---|--------------|---|
|  | Area         | You want to emphasize the magnitude of change over time. Use an area chart to show how much the value of a measure changes over time. |
|  | Stacked Area | You want to emphasise the magnitude of change over time, while comparing multiple categories.   |

### Bar Charts

| Icon  | Type                   | When To Use  |
|---|------------------------|--|
|  | Horizontal Bar         | You want to highlight values for easy comparison and plot your numbers horizontally. Use a bar chart to place less emphasis on time and focus on comparing values. |
|  | Stacked Horizontal Bar | Categorical data grouped or stacked to assist comparison. Use when part-to-whole comparison is important.  |
|  | Proportional Bar       | Displays how close values in different categories came to the highest category value.  |

## Column Charts

| Icon  | Type                 | When To Use   |
|---|----------------------|---|
|  | Vertical Column      | You want to highlight values for easy comparison and plot your numbers vertically. Use a column chart to place less emphasis on time and focus on comparing values. |
|  | Stacked Vertical Bar | Also referred to as stacked column charts and used when part-to-whole comparison is important.  |
|  | Layered              | Compares the contribution of each value to a total across categories.   |

## Combination Charts

| Icon  | Type               | When To Use  |
|---|--------------------|--|
|  | Combination Charts | Combination charts, in effect, superimpose one chart type above or below another. Use to improve clarity and highlight relationships between data sets.                        |
|  | Overlay Chart      | Use the line chart to emphasize a trend and bars to emphasize specific values. Line/Bar combinations may work better by de-emphasizing bars through the use of subtle colours. |

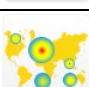

## Financial Charts

| Icon  | Type           | When To Use  |
|---|----------------|--|
|  | Financial Line | Use this chart to display a trading value with a sub chart displaying volume.                                      |
|  | High Low       | Shows daily high, low, opening and closing values with tick positions corresponding to opening and closing values. |
|  | Candlestick    | Shows daily high, low, opening and closing values with different colour bars depending on the daily direction.     |

## Line Charts

| Icon  | Type         | When To Use   |
|---|--------------|---|
|  | Line         | You want to view trends over time by plotting data at points connected by lines. Use a line chart to plot many metrics. |
|  | Z Chart      | Trends over a short period of time; displaying the data, accumulative total, and moving total.                          |
|  | Stepped Line | A line chart where movement is shown in steps rather than straight lines.   |

## Maps

| Icon  | Type            | When To Use  |
|---|-----------------|--|
|  | Image Maps      | If you do not have GIS defined columns you can use the Image Maps to create heat maps – these are a good way to display metrics with a spatial element such as Revenue by State or Country |
|  | Google Maps     | Google Maps allow you to render location data points onto a Google map which will be displayed as a Yellowfin Chart – along with associated Google map widgets                             |
|  | GIS Google Maps | A Google map which uses GIS data for its marker coordinates.   |
|  | GIS Maps        | GIS Maps allow the rendering of complex GIS polygons. These can be used to render spatial reports on the fly based on the GIS data available in a report.                                  |
|  | GIS Bubble Map  | A bubble map in which bubble positions are specified by GIS points.  |
|  | GIS Heat Map    | A heat map where colours representing GIS points are blended based on intensity.   |

## Meter Charts

| Icon  | Type            | When To Use  |
|---|-----------------|--|
|  | Meter           | You want to measure the rate of change of a measure against pre-defined targets. Useful for dashboard reporting. |
|  | Thermometer     | Vertical representation of the meter chart, indicating a range of qualitative indicators.                        |
|  | Dial            | Used to communicate key performance indicators.  |
|  | Numeric Display | Shows the value of a metric on a digital display.  |

## Pie Charts

| Icon  | Type      | When To Use   |
|---|-----------|---|
|  | Pie       | You want to show the relationship of parts to the whole. Use a pie chart to highlight proportions rather than actual values. If it is important to show actual values in the chart, avoid using the pie chart type. |
|  | Multi Pie | Vertical representation of the meter chart, indicating a range of qualitative indicators.   |
|  | Ring      | Similar to the pie chart, but in a circular ring form.  |

## Special Purpose Charts

| Icon   | Type                     | When To Use   |
|--|--------------------------|---|
|   | Funnel                   | Used to show the status of stages in a process.   |
|   | Proportional Infographic | Displays segments on an image, with the segment size representing metric value.   |
|   | Comparative Infographic  | Displays images sized in such a way to correspond to a metric.  |
|   | Radar                    | You want to compare data by integrating multiple axes into a single radial figure.  |
|   | Waterfall                | Waterfall charts are a special type of Floating Column Chart. A typical waterfall chart shows how an initial value is increased and decreased by a series of intermediate values, leading to a final value. |
|   | Event                    | Maps the occurrence of events against the values of a numeric data set over time.   |
|  | Week Density             | Shows the density of occurrences based on hour relative to other densities on the same day of the week.   |
